EXPERIENCE

TOAST

Jan - June 2020

Software Engineer Co-op

- Designed and implemented internal React.js web app config tools for Toast Drop Points
- Added new UI and functionality to the Toast Takeout iOS App to enable delivery
- Participated in user research and investigated analytic data in order to enable the team to better prioritize feature enhancements and improve upon existing interface designs

COLLEGE OF ARTS, MEDIA, AND DESIGN

Oct 2018 - Present

Laser / 3D Print Monitor

- Assist students in the digital design of their sculpture and illustration projects
- Instruct students on the proper operation of the laser cutting and 3D printing equipment

CHEWY

Jan - June 2019

Software Engineer Co-op

- Worked with Fulfillment Planning team to create Ship Route Manager project [SRM]
- Designed SRM database schema in PostgreSQL, using Flyway to automate migrations
- Implemented SRM backend logic for excel parsing and validation in Java
- Developed frontend interface for SRM as a Single Page Application with Vue.js
- Collaborated with senior UX designer to design wireframes for SRM
